

DAB Antenna Installation

1. Disassemble the plastic border of the right window.

2. Remove the protective paper from the black film and the transparent film on the Antenna.

3. Stick the black film on the metal frame and the transparent film on the glass. (Remember to leave space for putting the plastic border)

4. Tighten the black film and the transparent film, and fix the cable securely.

5. Put the plastic border back. (Be careful do not break the cable)
